

Mockup User Interface

Users will first see the main page (1) upon entering the website. If the user selects “login” (2), they will be prompted to enter their email and password. Otherwise, users can sign up as a new user (3) if they “don’t have an account”. Users will be prompted to input a username, a valid email address and a password.

Upon taking the test, users are prompted to first complete a personality test consisting of 42 questions (4). Afterwards, users will key in their academic information (‘GCE’ A Levels/Polytechnic grades) and subject interests (5).

Based on what the users has provided to FindMyCollege (6), FindMyCollege will recommend a curated set of courses at every public university in Singapore that it believes is best suited for the users subject interests, personality and qualifications. Details can be found by selecting a particular course (7). Details include:

1. The name of the school offering the particular course
2. The A Level/Polytechnic grade of the lower 10th percentile of the current cohort
3. RIASEC code
4. Related subjects
5. A Level prerequisites
6. Additional requirements
7. Gross monthly mean and the Employability Rate of a graduate student of that particular course plotted over time
